

Assistant Director for Scientific Intelligence

1 May 1956

ELINT Staff Officer

Request for Services of

1. As you are aware for the past month, both of ELINT Branch, Electronics Division, have been working with Project AQUATONE special analysis equipment. We feel it would be extremely fruitful if these two individuals could visit the West Coast component of the Project to receive briefings, demonstrations and to establish contacts.

2. Specific date of departure has not yet been determined but would be approximately the latter part of next week, and the duration of the visit would be two or three days.

3. It would therefore be appreciated if could be made available for travel to the West Coast.
